TDIP
v1.0
Q1-Q2 2019

SOFT CAP
\$40,000 USD

HARD-CAP
\$199,800 USD

CAPITAL RAISED
\$57,330 USD

RESULT
SUCCESS 

SUMMARY

Maxvest Acceptus (TDIP 1.0) is the first successful use of Token Distribution Investment Platform (TDIP) technology operated by MVG. This report describes the investment structure used, the crowdfunding & token distribution statistics as well as the achievements made during the platforms operation.

PLATFORM INTEREST STRUCTURE

The MVG team executed the first TDIP instance using an interest structure adjusted to give higher investor ROI in order to enable accelerated crowdfunding progress during the beginning of the project as well as to invite new investors to try the very first release of our new crowdfunding investment technology.

The use of this high-yield structure ultimately resulted in quick exposure to investment fund industry clients who were in search of competitive interest and quicker ROI which has assisted in successfully building the initial foundations of the project's following.

TDIP v1.0 offered 4 base investment plans with 17 possible customisations:

- 103% in 5 Days with 2 available customisations.
- 0.5% hourly for 10 days with 2 available customisations.
- 13% daily for 11 days with 5 available customisations.
- 120% in 7 Days with 8 available customisations.

By offering customisable & competitive ROI, Maxvest was able to successfully raise \$57,000 USD in capital reserved for the continued growth and development of the project. New development releases & marketing campaigns as a result of the raised capital will be reflected during the operation of Maxvest Profectus (v2.0).

PROJECT MILESTONES

During the first quarter of 2019, MVG achieved all of the expected targets required to move forward with development, continued growth & overall prosperity of the project. Some of our most notable achievements based on this reports provided statistics and details, are listed below:

Maxvest Acceptus (TDIP v1.0) Success, Concept validated.

Successful launch, operation and completion of Maxvest Acceptus Platform (TDIP v1.0), marking the validation and profitability of the Token Distribution Investment Platform (TDIP) technology concept.

Max [MVG] Token Successful Introduction

Successful introduction and fair distribution of the project-wide valuing ERC-20 token, Max [MVG].

MVG Initial Partnerships

Indication of industry support of concept & technology from cryptocurrency exchanges & investment blogs.

Community Foundations Established

Establishment of the MVG community, through social media channels, forums & chat networks.
